

Adding A System to the Domain

How to Join your computer to a Domain. You must be logged on as an administrator or a member of the Administrators group. (This will only work if you successfully configured a Domain Controller properly.)

1. Logon as Administrator. Go to system properties.
2. On the computer name click change. On the computer name changes dialog box, select Domain and enter the domain in the text box.

3. Click Ok.
4. Provide the user name and password credentials to show you have the permissions to join the desired domain.
5. Soon the Welcome to the domain message will appear. Click Ok and you will receive a prompt to restart your computer for the changes to take effect.
6. Congratulations, you have successfully joined your computer to the domain.
