# *VMware Workstation 12 Setup*
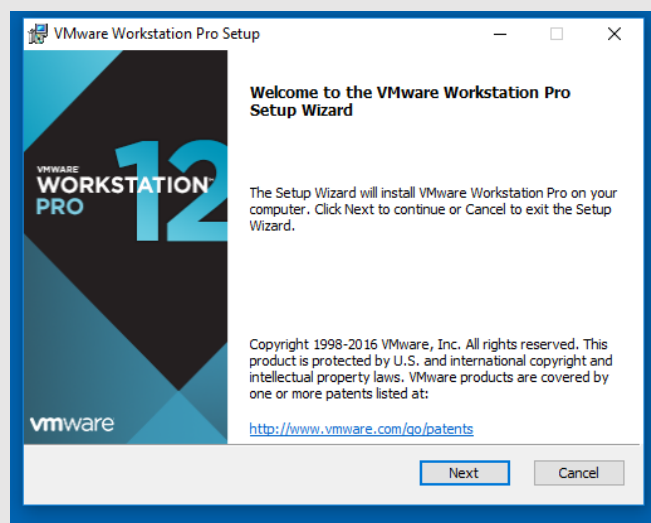

How to setup a typical VMware Workstation.

1. Download *VMware-workstation-full-12.5.0-4352439.exe* and open the file.

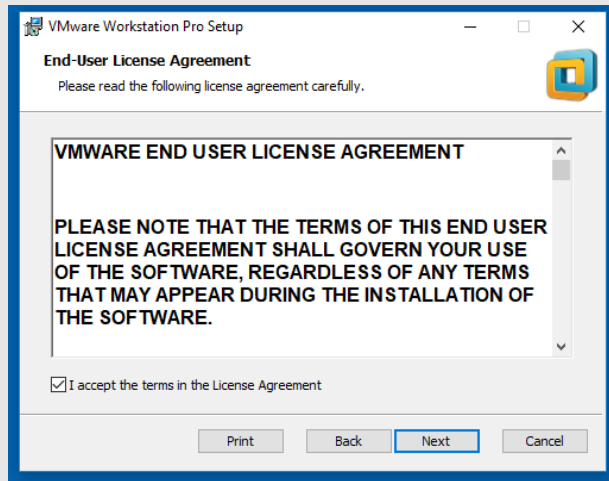

2. VMware Workstation Pro 12 will begin VMware Product Installation.

3. The setup screen will appear. Select Next

4. Accept the terms in the License Agreement. Then select Next.

5. The custom setup screen will appear. Check mark the Enhanced Keyboard Driver to install. (Optional)

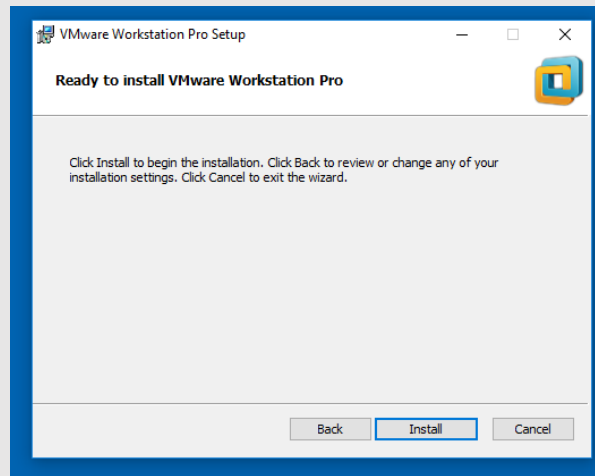

6. On the User Experience Settings page, uncheck the Check for product updates on startup and Help improve VMware Workstation Pro boxes.
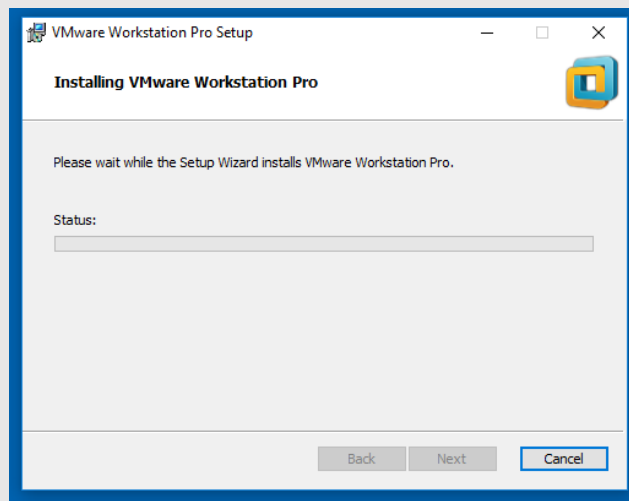

7. The shortcut page will allow you to create shortcuts for VMware Workstation.

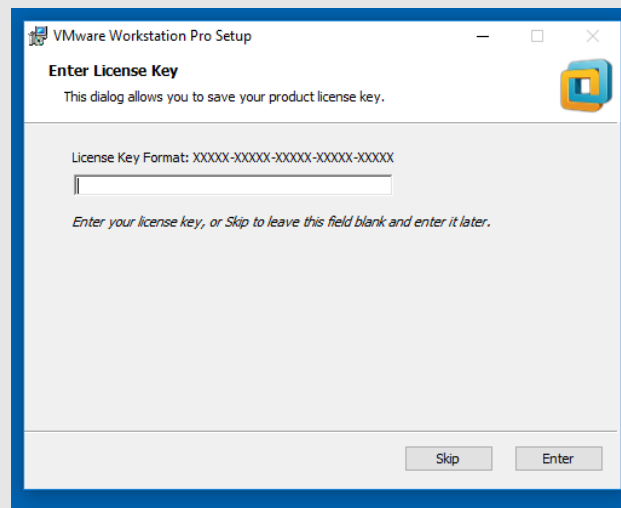

8. Once you are ready to install VMware Workstation Pro click Install to begin the installation.

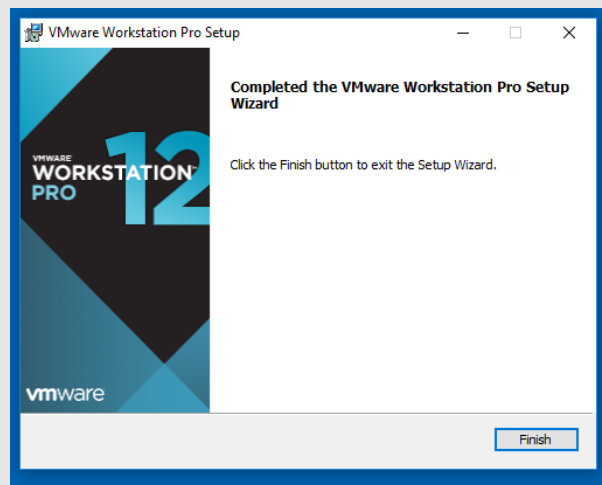

9. Please wait while the Setup Wizard installs VMware Workstation Pro.

10. Once the installation is complete. Enter the license key.

11. Click the Finish button to exit the Setup Wizard.

12. Select Yes to restart your system to configure changes made to VMware Workstation to take effect.

13. After your system has restarted. Select the VMware Workstation application

14. VMware Workstation will open. Congratulations you have installed VMware Workstation Pro 12.
